

【Flavor characteristics intended by the brewer】

The brewer aimed to keep balance between a taste you won't get tired of and full-bodied taste which is provided by both 6% alcohol and quality bitterness derived from Hersbrucker hops.

【Ingredients / Type of process】

- This beer is based on low-malt beer (Happoshu) made with malt, hops, polished barley, corn, and sugars, adding barley spirits during the filtration process.
- Clear amber color is achieved by the filtration process.
- Using some Germany Hersbrucker hops provide a quality bitterness harmonizing with the deep malt flavor and the 6% alcohol body.
 - Long-term aging at low temperatures during storage results in a clear taste with reduced off-flavors.
